

Malia Wakesho-Ajwang

London, UK | Atlanta, USA

(940) 205-3878

malia.wakeshoajwang@gmail.com

EDUCATION

Emory University, College of Arts and Sciences, Atlanta, GA

May 2026

Bachelor of Art

Atlanta, GA

GPA: 3.75/4.00

Double major in Computer Science and Psychology

Conducted independent research focused on academic benefits of technology for college students with ADHD

Relevant course work: Artificial Intelligence, Human-Computer Interaction, Computer Science Practicum, Social Entrepreneurship, Psychology of Leadership, Scholarly Inquiry and Research Experience Program

PROGRAMMING AND TECHNICAL SKILLS

Front-End Development - HTML, CSS, JavaScript, React, Bootstrap, Angular, Vue.js, jQuery

Programming Languages - Python, Java, Swift

Web Development - UI/UX Design, Responsive Design, Node.js

Consulting & Innovation - Usability Testing, Performance Optimization, Lean Startup, Human-Centered Design

PROGRAMMING SKILLS

Responsive Club Website - Created a responsive website ensuring cross-device compatibility.

Mixed Messages - Developed a Node.js console application to generate positive messages and track impact on user reported mood. Utilized Git for version control.

Portfolio Website - More projects and programming skills can be viewed at <https://maliawakeshoajwang.github.io/portfolio>

EXPERIENCE

Asoma Digital LTD, Atlanta, GA / London, UK

Jan 2025 - Present

Chief Executive Officer and Founder

- Oversee UX/UI design, product strategy, and development of the MVP leveraging React Native, and Supabase.
- Building and manage a cross-functional team of designers, developers, and researchers; lead weekly sprints and milestone reviews using ClickUp and GitHub Projects.
- Accepted into RightShift Accelerator, The Hatchery Incubator, and Techstars Emory Founder Catalyst Program for early-stage ventures.
- Design and implement data-driven task management and focus features (Pomodoro, Top 3 Tasks, Eisenhower matrix) informed by psychological research.

The Hatchery, Atlanta, GA

Sep 2024 - Present

Innovation Consulting Fellow

- Advised 5+ student ventures on innovation strategies leveraging Lean Startup and Human-Centered Design, guiding teams from idea to launch.
- Led a 3 month development of a testable mobile app prototype (React Native), serving as project manager and overseeing design, coding, and testing.
- Drove one venture from idea phase to distribution, creating and validating a scalable go-to-market strategy.
- Optimized The Hatchery's automation workflows, improving one process's speed by 91%.

J.P. Morgan, Remote

Jun 2024 - Jun 2024

Software Engineering Virtual Experience Trainee

- Developed a live graph visualization dashboard using Python, React, and J.P. Morgan's Perspective library, allowing traders to dynamically monitor and analyze real-time market trends.
- Diagnosed and fixed critical bugs in data pipeline of a web application, ensuring accurate real-time updates and preventing crashes during high-volume market data processing.
- Collaborated in a simulated agile team environment, practicing Git branching, pull requests, and peer code reviews to mirror J.P. Morgan's software engineering workflow.
- Utilized Python-based data pipeline integration with visualization frameworks to improve decision-making efficiency for financial analysts and portfolio managers in global markets.

HONORS

Eagles Abroad Scholarship (Two-time Recipient) - Copenhagen, Denmark and Taipei, Taiwan (Jun - Dec 2025)

Outstanding Delegate, Yale Model African Union IV (Mar 2025)

Finalist, National Cyber Security Challenge (Aug 2021)

Scholar, Fulbright Sutton Trust Scholar (Febr 2021)
